

New 5L HDPE Bottle

For Fisher Chemical Solvents

Improved

The new 5 liter fluorinated* HDPE bottle increases product quality and safety

- **High strength-to-weight ratio**
 - Resistant to aggressive solvents
 - Preserves product quality for longer
 - Less risk of packaging damage in transit and storage
- **Integrated carrier handle**
 - Convenient to handle
 - Easier pouring, reducing potential for spillage

Packaging specifications

Closure type: DIN 45 screw cap

Nominal capacity: 5L

Total height: 336mm with cap

Body: 168 x 168mm

Material: Fluorinated HD polyethylene

Cap with internal tamper evidence

UN-approved-3H1/X1.3/250

*Plastic packaging is not suitable for some solvents due to their aggressive nature causing deterioration of the polymer. That deterioration can be considerably reduced by the fluorination process, allowing these solvents to be packed in the treated plastic. Fisher Chemical packs aggressive products in pre-treated (fluorinated) bottles.
